Catalog 2021- 2022

FOREWORD

Since 1976, we've worked hard to give our customers quality water products and services. We have overcome many challenges over the last 40 years. Going forward, our strategy revolves around better availability, better communication, and better solutions.

We're improving our market coverage through key dealer accounts and enhancing dealer training so customers can get faster, quality customer support. By improving distribution, we hope to deliver reliable solutions to more homes and families nationwide.

We're also adopting communication technologies to enable our customers to reach us more easily, at their convenience.

Finally, we continue to improve our products with new innovations, especially green products. Customers can expect an expanded water treatment line, particularly under-the-sink purifiers, point-of-entry softeners and UV systems. We've also added Ozone Swim and Mineral Swim, great solutions to get the clearest pools possible. Our steam and sauna products also got an upgrade in reliability.

Ask about products with the green-leaf icon to know how they help the environment. GREEN CHOICE

The new year ahead of us is full of possibilities and we believe that having a healthy environment is a key to having a good life. That's why we move forward to enhance life for our customers by continually improving water.

TABLE OF CONTENTS

Air Purifier

The Visible Clean Air

Innovation has a name.

100m²/30'

PM 2.5

RealTime

Formaldehyde

Super fast filters

Cleans air in just 30 Min. of 100m² room

Super fine dust filter

Super smooth removal of PM 2.5 (Super fine dust) due to MERV17 standard HEPA filtration

Air quality in real time

Patented smart sensor gives precise PM 2.5 dust density in real time

Formaldehyde Purification

Formaldehyde, which is the most active compound of TVOC gases presented in household, is removed effectively to give fresh air output

	AOS KJ500F-B01	AOS KJ800-B01	AOS KJ1200F
Coverage Area	40-60 m2	56-96 m2	84-144 m2
Sensor	PM2.5 Laser & Infrared Sensor / VOC Sensor		
Power W	63	140	146
Efficiency on 0.3um	99.97%		
CADR Dust/Pollen	500 m3/hr	800 m3/hr	1,200 m3/hr
CADR Formaldehyde	120 m3/hr	180 m3/hr	627.6 m3/hr
Air Change Per Hour	5.7-3.3	5.7-3.3	5.7 - 3.3
Purification	3 Stages 6 Layers		4 Stages 8 layers
Filters	HEPA MERV7 Pre-Filter/ HEPA MERV17 Main Filter/Carbon		
Effective on Pollutants	PM100, PM10, PM2.5, PM0.3 TVOC Formaldehyde, Toluene, Tobacco Smoke Pollen, Dust Mite, Mold, Allergen, Odor		
Effective on Bacteria & Virus	S. Albus, S. Aureus, K. Pneumoniae, E. Coli		
Noise dB(A)	63/55/51/40	69/55/51/40	68/60/55/46
Activated Carbon	1kg	1.6kg	2.36 Kg

DID You Know?

Ozone and ions can be harmful to health, especially to small children.

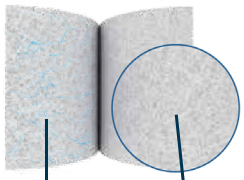
A. O. Smith uses 100% natural filtration technology to avoid re-polluting the air.

Humidity creates favorable conditions for the growth of bacteria and molds.

Make sure your air purifier does not increase air humidity.

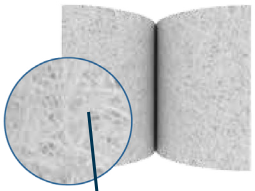
Comparison of HEPA Filter Membrane

MERV17 HEPA Filter Membrane of A. O. SMITH



VS

Conventional HEPA Filter Membrane



Glass fiber frame helps prolong the membrane filter.

PP non-woven, compresses filter, improves it in the long run.

PP thin layer woven into the mesh with large holes size, which limits the ability of filter to clean super smooth dust.

Primary Filter Membrane of A. O. Smith Standard MERV17

A. O. Smith Primary Filter

VS

Regular Primary Filter

Made of fiberglass and PP, Eliminates polluting components from PM 100 to PM 10, Helps in extending life of the main filter

Filter made of plastic steel , with large pore size, which lets PM 10 and above particles pass to main HEPA filter and reduce the life of HEPA filter

Filter Membranes

Large Density Carbon

High quality charcoal can absorb toxic substances contained in the air as Formalade, touene and TVOC.

HEPA MERV17

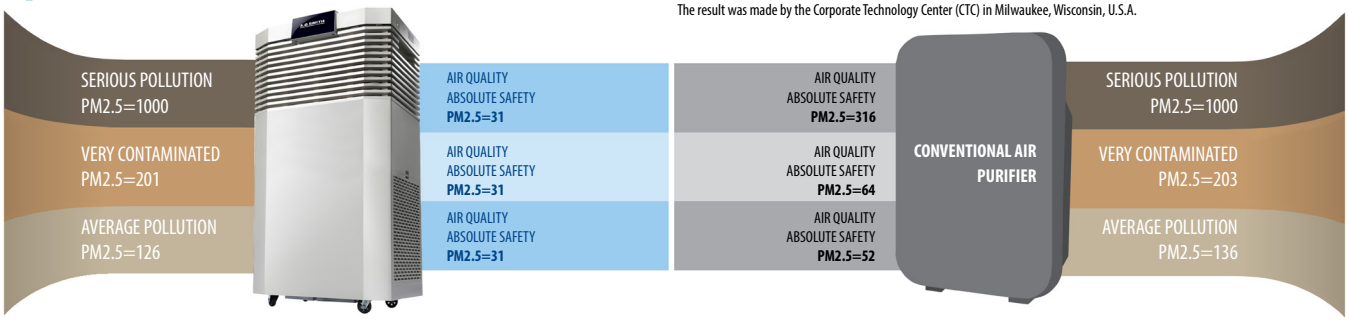
3.6 Meter square area can host a large amount of dust. high longevity.

A. O. Smith uses MERV17 standard HEPA Filters which can cover an area up to 100 folds from 3.6m2 filter area. The thick fold density helps the MERV17 HEPA membrane to filter PM 2.5 super smooth molecules with the highest performance and with longer life.

The Ability to clean air Super Fast

A. O. Smith Air Purifier with filtration capacity 500m³/h (CADR) takes just 24 minutes to clean a room of 26m² with heavy pollution and with PM2.5 dust levels at 1000mcg/m³.

The result was made by the Corporate Technology Center (CTC) in Milwaukee, Wisconsin, U.S.A.



A. O. Smith AIR PURIFIER
CADR 500

CONVENTIONAL AIR PURIFIER
CADR 216

Above given results of experiment conducted in 26m² room with PM 2.5 as Primary pollutants. The comparison shows the filtration capacity between A. O. Smith Air Purifier with CADR 500 m³/h and other air purifier with CADR 216m³/h.

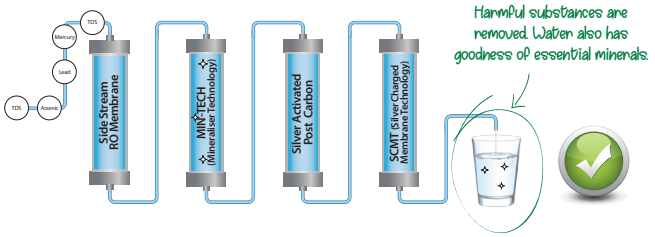
A.O. Smith
Innovation has a name.

Unmatched features. Designed to suit your lifestyle.

Protect your family's health with advanced technology that gives you 100% RO water. A. O. Smith's RO water purifiers give your family healthy water with the goodness of essential minerals. They offer state-of-the-art design with features and conveniences like warm and hot water at the press of a button, as well as night assist technology which beautifully lights up your kitchen and is also very convenient for a glass of water at night.

Why Reverse Osmosis?

100% RO + MINERALS + SCMT



Pure Water in every drop

We are aware of how important water has become in today's conditions where clean drinking water supply is decreasing constantly. Therefore, A.O. Smith is striving to develop technologies that will enable you to easily obtain top-quality, healthy drinking water, both in your home and at your workplace.

Purification Technologies	A6 | Water Purifier	S7 | Water Purifier	S4 | Water Purifier

UV Water Purifier

Capacity: 9.2 litres (approximately)

HOT UV
UV PURIFIED WATER

Features

- 5 Stage: Pre-filter + Sediment filter + Silver Activated Post Carbon + UV Lamp + UFSS (For Hot water only)
- UV is a proven Non-chemical, disinfectant technology to give you healthy water
- Suitable for water up to 200 ppm TDS
- UV purified with choice of 45°C and 80°C temperature settings
- Glow effect guides you to your water purifier at night
- Indicates in advance when the UV Lamp needs to be changed
- Comes with pre-filter for effective removal of suspended solids and sediment
- Provision for both wall mounting & table top
- Digital display for simple and intelligent display of information

ADR75-V-E-T-1 RO+UV Purifier

A. O. Smith's Floor-standing purifier with firm and elegant design is the best for drinking water for your family and office.

Hot - Cold - Ambient Water
Make your own coffee, cold juice or a glass of drinking water with a single click, meeting all the drinking water needs for your family or office.

Double protection with UV Light
Non-chemical sterilization technology eliminate up to 99.99% of viruses, bacteria, molds and other pathogenic microorganisms.

Child lock function

Capacity:
Ambient: 7L
Hot: 2L
Cold: 2L

Total Power: 630W
Hot: 500W, Cold: 85W

HxWxD (mm): 1220 x 380 x 420

Aquasana AQ-4000W DIY Water Filter

Direct to kitchen faucet installation for quick DIY installation

4 Filtration Methods:
- Activated carbon
- Catalytic carbon
- Ion-exchange
- Sub-micron filtration

HxWxD: 241.3 x 101.6 x 228.6 mm

S600 Tankless RO Purifier

Pure water delivered fresh, always

Features:
- 4-stage RO purification
- DIY filter replacements
- Carbon block
- 2:1 pure water vs reject water ratio
- Electronic faucet lets you know when to change filters

H x D x W: 430 x 185 x 310 mm

The Clean Water Filter

Fast, filtered water from your main faucet
- Claryum filtration reduces up to 99% of 77 harmful contaminants
- IAPMO tested and certified to NSF/ANSI standards 42, 53, and 401+P473

Flow rate: 1.5 gpm
Filter life: 784 gallons or 6 months

Invi U1 5-Stage UV Water Purifier

5 Stage Purification:
- Sediment
- Fine Sediment
- Carbon block
- UV
- Silver Activated Post Carbon

Power (max): 36W

HxWxD: 324 x 230 x 236 mm

Intelligent Flush System I Water Leakage Protection I NSF Safe and Reliable I Required Water Pressure 14.5-50 psi

A.O. Smith FS-55A Beauty Shower with Infused Vitamin C

An adjustable beautiful shower head with built-in Vitamin-C infused shower filter.

- Up to 90% of chlorine in your water will be removed
- Prevents having bleached skin, peeled off skin layer and allergies as well as dry hair, hair breakage and split ends
- Imports vitamin C essence using lemons
- 0.5mm water outlet for a smoother water flow
- Can spray two times higher compared to ordinary shower heads
- Features multiple bathing modes, an elegant appearance and a corrosion-resistant surface treatment

Aquasana AQ-4100NSH Shower Filter

A shower filter that is used together with your existing shower head to provide you with the healthiest shower experience.

Specifications:
Pressure range: 50psi
Rated Flow: 2.5gpm
Operating Pressure: 30-80 psi
Max Operating Temperature: 115°F
Filter Life: 6 months

A.O. Smith AO-FF Fridge/Freezer Water Filter

Filters water from your refrigerator/freezer by reducing up to 99% of 77 harmful contaminants.

Specifications:
Dimensions (HxWxD in.): 8.75 x 4 x 3
Filter Life: 6 months
Flow Rate: 0.5 gpm

Sediment Pre-filters

Spin-down pre-filters that prevent impurities and sediments from entering your water line, protecting your water heater and other appliances

Features:
- Prolongs the life of your water heater and other appliances
- High precision, food-grade stainless steel filter mesh
- Easy, Fuss-free Maintenance

A.O. Smith AO-WH-FILTER Central Water Filter

- Clean, filtered water for your entire home
- For households with 4 or more people
- Reduces 97% of chlorine taste and odor for 6 years or 600,000 gallons using Granular Activated Carbon (GAC)

Dimensions: Height: 29", Diameter: 9"
Flow rate: 7 gallons per minute

AO Smith AO-WH-DSCLR Salt-Free Water Conditioner

- For households with 4 or more people
- Reduces scale build-up for 6-years or 600,000 gallons
- Reduces sediment and turbidity

Dimensions: Height: 26.5", Diameter: 8"
Flow rate: 7 gallons per minute

Innovation has a name.

A. O. Smith Water Softeners

HOW WATER SOFTENERS PERFORM IN YOUR HOME...

CLEANER
More efficient on dish washing and laundry

SOFTER
Hair will shine after showering, and have a silky, smooth feel

BRIGHTER
Brighter, softer, and longer lasting clothing

LONGER
Extend the life of appliances and plumbing

AO-WH-SOFT-PRO-500

- Capacity: 50,000 grains
- Direct wi-fi connection with text and email alerts
- Softener Resin: 47L
- Easy controller access
- Max hardness: 110 gpg / 1885 ppm
- Max. iron reduction: 10 ppm
- Color touch screen controller
- 200 lb salt capacity
- 39.5” High

Touch screen controller

Salt-sensing technology
Adapts to your water usage: allowing for less salt, water and energy use.

Designed, engineered and built to last
Patented, slim, single-unit design with bypass valve.

No filter changes-ever
Save time and money with the 20 micron self-cleaning pre-filter.

Fast and quiet regeneration
Quickly renew the resin beads to remove hardness from water.

Power loss protection
Back-up battery saves your settings in case of power loss.

AO-WH-SOFT-PRO-300

Integrated Central Filtration reduces chlorine taste and odor

- Capacity: 30,000 grains
- Wifi-enabled notifications
- Softener Resin: 28.3L
- 2lbs Garnet -- 20 micron filtration
- Max hardness: 90 gpg / 1540 ppm
- Max. chlorine: 3 ppm
- Color touch screen controller
- 200 lbs salt capacity
- 39.5” high

AO-WH-SOFT-450T

- Capacity: 45,000 grains
- Wi-fi controller with text/email alerts
- Softener Resin: 35.4L
- 2 lbs. Garnet –20 Micron Filtration
- Max hardness: 100 gpg / 1710 ppm
- Color touch screen controller
- 200 lb salt capacity
- 39.5” High

UV Disinfection BIO UV

Domestic drinking water and small communities

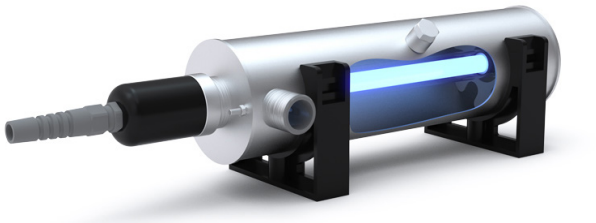
The BIO-UV reactors in the UV HOME and IBP ranges are used to:
- make raw water coming from local drinkable resources (wells, boreholes, catchments etc.)
- make water in the system safe to drink, particularly after dechlorination using active charcoal
- make recycled rainwater safe for domestic use only

PRINCIPLE
The sun emits invisible light: ultraviolet light. This natural phenomenon is reproduced inside the reactors in the BIO-UV Group's ranges using powerful lamps, the result of leading-edge technology, that emit UV-C rays.

At 254 nanometers, the optimum wavelength for destroying microorganisms (viruses, bacteria, algae, yeasts, mould...), the UV-C rays penetrate to the heart of DNA and disturb the metabolism of cells until they are totally destroyed. All germs are thus deactivated (including Legionella and Cryptosporidium) and cannot reproduce.

Effective Dose

The reactors in the BIO-UV ranges are dimensioned according to the pump flow rate, as it is the combination of the contact time in the reactor and the power of the lamp(s) that will ensure that the necessary dose (expressed in millijoules per square centimeter or mJ/cm2) sufficient to kill 99.9% of the microorganisms (bacteria, viruses, algae in suspension) is received.



Description	Max. flow rate in m3/h * for 16 millijoules	Max. flow rate in m3/h * for 30 millijoules	Max. flow rate in m3/h * for 40 millijoules	UV lamp : Number x Power consumption	Connection	Height of reactor in mm	Diameter of reactor in mm	Stainless Steel
UV HOME 2	5.5 (24GPM)	2.9 (13GPM)	2.2 (10GPM)	1 x 33 W	¾"	446	90	304L

Deep Bed Filter

The deep bed sand filter is used to filter the water supply for domestic or light commercial use.
The filter bed traps undesired elements from the water like rust, sand, dirt and other solids.

Features:
Easy installation; 1" Multiport valve; Pressure gauge; Max Working Pressure: 100 psi / 7 bars; Max. Temperature: 50°C

Specifications:
Filter Area (m^2): 0.10
Valve Connection: 1"
Max. Flow Rate: 68.31 lpm / 18 gpm
Sand Required: 98 kg / 216.05 lbs
Dimensions: 390 mm x 390 mm x 1500 mm

Media	Purpose
Sand	Sediment and iron filtration
Manganese Greensand	Reduces iron, iron algae, bacteria. Reduces manganese. If there is 2 ppm of iron, also reduces up to 5ppm of hydrogen sulfide
Activated Carbon	Reduces tastes, odors, and most man-made pollutants (VOC)
Calcite/Corosex	Raises pH of most low pH water
Birm	Reduces iron and manganese when water has dissolved oxygen
Filter-Ag or crystalline quartz	Reduces turbidity or suspended solids
KDF55	Reduces chlorine, heavy metals; bacteriastatic
KDF85	Reduces iron, hydrogen sulfide; bacteriastatic
Chlorine	Used as a disinfectant to kill bacteria

Deep Bed Filter
HD 13350

aquasana | pro series

HIGH PERFORMANCE WATER FILTRATION *for Foodservice*

POWERFUL

Comprehensive, high performance solutions designed for your needs

- Effectively reduces chlorine, chloramine, scale and cysts, such as cryptosporidium and giardia
- Improves taste of water, ice, soda, coffee and tea

GREEN

Sustainable for the environment and your budget

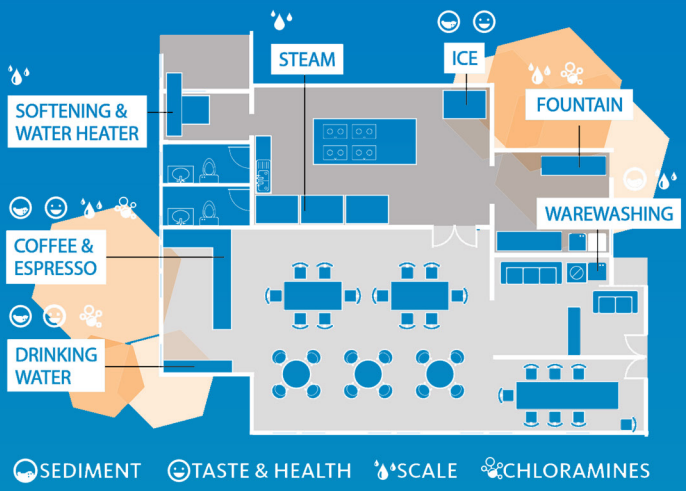
- Scale inhibitors extend life of kitchen equipment
- Equipment runs more efficiently saving energy and money

SIMPLE

Easy to use, easy to maintain

- Intuitive design and shut-off valves for easy maintenance
- Features our unique easy change housing for quick, painless replacements

How Can Aquasana Benefit Your Restaurant?



Our filtration cartridges feature carbon-based Chloramine and Chlorine reduction capabilities that improve the taste of water for sodas, coffee, tea and other water-based beverages.

In addition, our sub-micron filtration removes cysts – such as cryptosporidium and giardia – and other harmful contaminants that can impact the quality of your water.

HYBRID WATER HEATERS

A.O. Smith
Innovation has a name.

SAVE ENERGY

With heat pump technology, you'll have great savings making it an ideal investment for the wise and practical. Check out our growing family of heat pump water heaters to match your hot water needs.

HOW HEAT PUMP WATER HEATERS WORK?

Heat pump water heaters capture heat and humidity from the surrounding air through the cooling coil and utilize it for heating potable water. Simply put, the heat is moved from where it is not needed to where it is wanted. This innovative advanced technology provides low cost hot water and free cooling (by-product).

WHY ARE HEAT PUMP WATER HEATERS AN ENVIRONMENTALLY FRIENDLY CHOICE?

- High efficiency with coefficient of performance (COP) up to 4
- No fossil fuels are used or burned at the source
- Ozone layer-friendly refrigerant R134a
- Uses less electricity than standard electric water heaters
- Contributes to space cooling at the same time
- Taps into heat sources typically discarded by other units for peak efficiency

Voltex Hybrid Electric Water Heater

The Voltex® hybrid electric heat pump water heater lives up to its impressive reputation. The Voltex line has larger storage capacities, which means more energy stored, resulting in increased savings. The consumer-friendly display is simple to operate and provides easy-to-understand feedback on operational status.

- Four Operating Modes: Efficiency, Hybrid, Electric, Vacation
- ENERGY STAR® qualified
- Backup Incoloy Heating Elements
- Dry Fire Protection checks that the tank is full of water before start up
- LCD User Interface with Advanced Diagnostics
- Dehumidification
- Coregard Anode Rod
- Easy Maintenance with washable heat pump filter
- 2" CFC-Free Foam Insulation
- Ozone Friendly R134A refrigerant
- UL Listed

World's largest heater factory in Tennessee
Manufacturing facilities in USA, Mexico, Canada, Turkey, China, and India
#1 Market Share in North America and in China
Over 13,000 employees worldwide

EnergySaver

ProMax

- Blue Diamond Commercial Grade Glass-Lined Tank
- DYNACLEAN™ diffuser tube helps reduce lime and sediment buildup while maximizing hot water output (made from long-lasting PEX cross-linked polymer)
- COREGARD™ anode rod with stainless steel core protects tank against corrosion longer than ordinary steel anodes.
- Durable, Tamper-resistant brass drain valve
- CSA/ASME certified T&P relief valve

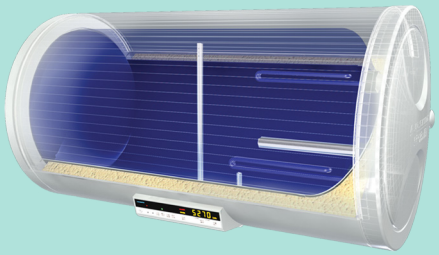
Choose A. O. Smith Heaters for Genuine Blue Diamond Glass Coating for Ultimate Corrosion Resistance



Abundant hot water is essential to a modern lifestyle, but water at high temperature is tough on the tank and internal components of a water heater. Effective protection against corrosive effects of hot water is essential in prolonging the life of a water heater.

In 1936, A.O. Smith Water Products Company was the first to patent a process for producing a “glass -lined” water heater tank, one of many A.O. Smith firsts in water heating technology. Now, we have raised the bar, with Blue Diamond protective coating.

At the heart of almost every water heater is a steel tank. A porcelain “glass lining” protects the tank against the corrosive effects of hot water. Our breakthrough Blue Diamond formula is enriched with a higher level of zircon, producing a lining that is harder and more water-resistant than any other in the industry.

The superior water resistance of Blue Diamond has been demonstrated in accelerated tests against glass lining samples taken from competitive water heaters.

These tests determined water resistance by measuring the rate at which each glass lining sample dissolved over the 20-week cycle. The results (expressed in milligrams [mg] of weight loss per square inch of lining surface) indicate how the glass lining will stand up to constant exposure to hot water. The lowest mg/sq. in. loss shows that Blue Diamond outlasts them all!

Tankless Gas Water Heater

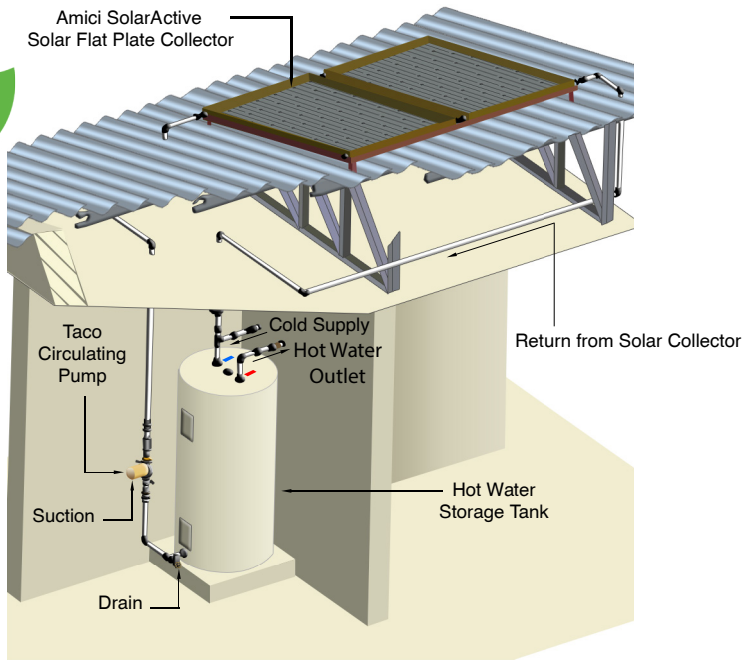
LP gas-fired tankless water heaters are common in Europe, China and increasingly so in the USA. Using LPG as energy source, they have the advantages of electric instant water heaters, the most common type of heater in the Philippines. Compared to an electric water heater, a gas-fired water heater roughly halves operating costs.

Model	JSD 12	JSD 24
Rated gas pressure	2800 Pa / 0.41 psi	
Suitable water pressure	0.025 Mpa - 0.8 Mpa / 3.6 psi - 116 psi	
Exhaust style	Flue style, natural draft	
Ignition type	Water-control automatic continuous pulse ignition	
Safety Device	With overheat protection	
Gas inlet connection	Diameter 9.5mm hose connection	
Cool water connection	½" NPT	
Hot water connection	½" NPT	
Rated hot water capacity	6 L/min. (Delta T=25k)	12 L/min. (Delta T=25k)
Rated heat load	12 kw	24 kw (Approximately 82,000 BTU)

SolarActive GREEN CHOICE

Take advantage of the Philippine sun to give you hot water. Unlike solar photovoltaic systems for electrical generation, solar thermal systems have the high efficiency criteria to make them viable solutions for renewable energy usage.

With Amici's SolarActive water heaters, only the collector panels stay on the roof. There's greater flexibility in installation and architectural design.



Product Specifications						
Storage (US Gal.)	# of Panels	Collector Panel Area (m2)	Panel Weight (kg)	Storage Model	Height (in.)	Diameter (in.)
50 Gallons	1	2	39	EES-50	57.34	20.9
80 Gallons	2	4	78	EES-80	61.6	24.5
120 Gallons	3	6	117	EES-120	66.75	28.34

Collector Specifications	
Type	FP2.0 with black chrome coating
Gross Area	2000mm x 1000mm x 82mm
Aperture Area	1.84m2
Absorber Area	1.73m2
Cover	4mm thickness, patterned temper glass > 87% transitivity
Absorber Construction	Ultrasonic Welding
Header Material	Copper
Absorber Efficiency	Copper Black Chrome with Absorptivity > 96% Emissivity
Fin Thickness	0.15mm
Operation Pressure	1.2Mpa
Casing Frame	Aluminum Alloy casing is 1.3mm thickness with electrophoresis coating
Back Plate	0.5mm thickness aluminum back plate with plastic foil
Sealing	EPDM

Hot Water Storage Tank	
Manufacturer	A.O. Smith Water Products
Insulation	Non-CFC foam insulation
Pressure	150 psi working pressure
Sacrificial Anode Rod	included
Internal Tank Construction	Glass-lined, fused to steel by firing at a temperature range of 1400 to 1600 °F
Heating Elements	Low watt density 1" screw-in type, with Incoloy sheath
Temperature & Pressure Relief Valve	Included; ASME rated

Temperature Differential Control

The temperature differential control senses heat in the solar collectors and tanks and then controls the circulating pump to regulate the movement of heat energy. When water temperature in the collector is higher than the temperature in the water tank, the controller activates the pump to move hot water to the tank.

Control Specifications	
Operating voltage	AC220V/AC ±10% 50HZ/60HZ
Power Consumption	≤3W
Working environment	-10 °C ~50 °C RH≤90%
Resolution	1 °C Accuracy: ±1 °C

Solar Recirculating Pump	
Casing	Cast Iron / Bronze /Stainless Steel
Cartridge	Stainless Steel
Impeller	Non-Metallic
Shaft	Ceramic
Bearings	Carbon
Maximum Fluid Temperature	230 °F (110 °C)

ATMOR
Hot Water On Demand

Atmor 122PV Inverter Heater

- Smart Thermostatic Technology
- Digital Display
- DC Pump for quiet but powerful flow
- Dual Thermostat Protection
- Constant Pressure
- ELCB DP (Double Pole) for extra safety
- Luxurious Chrome Accessories
- Heating Capacity 3.5kW

Why Thermostatic?

Consistently Comfortable Shower
When you select your desired temperature through the heater's easy-to-use touch interface, the water heater automatically saves your preference for you.

Improved Energy Use
The low-to-high settings of conventional instant heaters control the electrical energy used to heat water. Because inlet water temperature changes every season, these heaters need to be constantly adjusted so as not to waste electricity.

Encourages Decreased Water Use
Thermostatic heaters will manage the temperature for you so that you get your desired water at your desired flow rate.

Less Operational Costs
Thermostatic heaters ultimately save you energy and water.

Atmor 102 Electronic Series

Atmor 102P

- DC Pump for quiet but powerful flow
- Electronic/flexible power settings
- Modern, Slim Design
- Designed for easy servicing
- Dual Thermostat Protection
- Built-in ELCB Dual Pole
- Luxurious Chrome Accessories

Atmor 102

- Electronic/Flexible power settings
- Modern, Slim design
- Designed for easy servicing
- Dual Thermostat Protection
- Built-in ELCB Dual Pole
- Elegant White and chrome shower accessories

Standard Features

- Splash-proof IPX5 Standard
- Heating Capacity 3.5kW
- 381 (H)*215*(W)*77(D)mm

Enjoy 100

- Modern, Slim design
- Mechanical 2-Power Settings
- Dual Thermostat Protection
- AirForce shower head included

AirForce Shower Head

- Stronger flow for less water and energy
- Rejuvenate skin cells - by increasing oxygen content in your water
- Provides air mixed with water
- Easy cleaning
- Available in white/red or white/gray colors

ATMOR
Hot Water On Demand

Atmor Thermoboost

- Smart Thermostatic Technology
- Digital Temperature Display
- Heats to exact desired temperature
- Touch buttons
- Prevents Flow of overheated water
- Magnetic Flow Switch Activated
- Heating Capacity: 5.5kW, 8kW, 10kW
- H 235 (mm) x W 289 (mm) D 104 (mm)

About Atmor

With over 40 years in instant heater technology, Atmor has established itself as a technology leader. Its products are designed in Israel and feature innovations such as:

- Smart Thermostatic Technology
- Temperature Stabilization Systems
- Digital Displays
- Shower Preference Memory

Atmor 800 Inline Heater for Pressurized/Multipoint Application

Features:

- Pressure Differential Flow Switch
- Built-in ELCB
- Dual Thermostat with Thermal Cut out
- Pressure relief device
- IP24
- 178 x 304 x 98mm

- kW, Breaker
- 3.5, 20A
- 5.5, 30A
- 8, 40A

TOP Electric Shower Head

- Built-in water filter at the inlet
- Integrated pressure relief valve
- Splash proof casing construction
- 2.0kW

TAP Instant Heater

- For kitchen or bathroom sink
- Easy temperature control
- Easy to install
- Heating Capacity: 3kW

Rain Shower Set

- Stainless Steel
- 100cm x 34cm
- For Single-point use
- Non-pressurized application

BlueWave

BW 405 Thermostatic

- Smart Thermostatic Technology heats to exact desired temperature
- Big Digital Display
- Electronic Stop/Start Control
- Shower Duration Display
- 4 Memory Settings
- Phased Shut Down
- Flow Stabilizer
- Heating Capacity: 5.5kW
- H 340 mm x W 238 mm x D 110 mm

BlueWave Sensa

Standard Features

- 3 Power Settings
- Replaceable Element
- Dual Thermostat Protection
- Splash-Proof

For single point / open vented
- Pressure Switch Activated
- 3.5 kW

For inline / multipoint
- PDFS venturi
- 3.5/5.5 kW

• Dimensions: H 185 mm x W 300 mm x D 110 mm

BlueWave 300 Series

BW 300

- 3 Power Settings
- Dual Thermostat Protection
- 3.5kW

Multipoint option
- PDFS Venturi Flow Switch
- Built in ELCB
- 3.5 or 5.5kW

BW 301

- 3 Power Settings
- Dual Thermostat Protection
- 3.5kW
- Flow Stabilizer
- Chrome Accessories

BW 302D

- 3 Power Settings
- Dual Thermostat Protection
- 3.5kw
- Flow Stabilizer
- Digital Temperature Display
- Phased Shutdown
- On/Off Button
- Chrome Accessories

Dimensions: H 340 mm x W 238 mm x D 110 mm

Open Vented Installation

*Open vented installation can provide hot water for a single tap in a certain residential/commercial unit.

Inline/Pressurized

*Inline/pressurized installation can provide hot water for multiple taps and showers.

Product Preservers Anti-Scale System

The Product Preservers® Anti-Scale System provides active protection against scale formation on your water heater or steam generator. This system does not add chemicals to the water or require electricity. As water flows through the filter, hard water minerals form inactive scale crystals that do not stick to the heat exchanger or piping.

Virtually maintenance free, one simple filter change every 2 years ensure continuous protection against scale. Replacing the filter is easier, faster, and less frequent.

Product Preservers Powered Anode

The Powered Anode is an ideal solution for eliminating smelly water caused by sacrificial magnesium anodes or to replace aluminum anodes where aluminum hydroxide is a problem. The system is also great for new residential gas or electric 30-50 gallon water heater installations providing protection with virtually no maintenance required. Protect your investment with a permanent anode rod made of titanium and mixed metal oxide that will never be depleted unlike traditional sacrificial anodes.

Taco

Taco Industrial Flow Switches

- Fluorosilicone Seal
- 250 psi Maximum Service Pressure
- 250°F Temperature Rating
- Stainless steel Paddles and Trip Rods
- NEMA 1 and NEMA 4 Models
- For Use on 1" to 8" Diameter Pipe
- UL, CSA, CE Approved

Taco Pressure Reducing Valve

- 10-50 psi dial-up pressure setting
- Replaceable cartridge for easy servicing
- Pressure balanced diaphragm
- Max inlet pressure: 250 psi
- Max temperature: 210 ^{0}F
- Each unit factory tested
- Body: Forged Brass
- Internal Parts: Stainless Steel and Engineered Plastics, Bronze, EPDM Seals
- Connection Size: $^1/_2$"

Taco Cartridge Circulators

- Max. Working Pressure: 125 psi
- RPM: 3250
- Stainless Steel Cartridge
- Non-Metallic Impeller
- Ceramic Shaft
- UL Listed
- IFC Model with integrated check valve

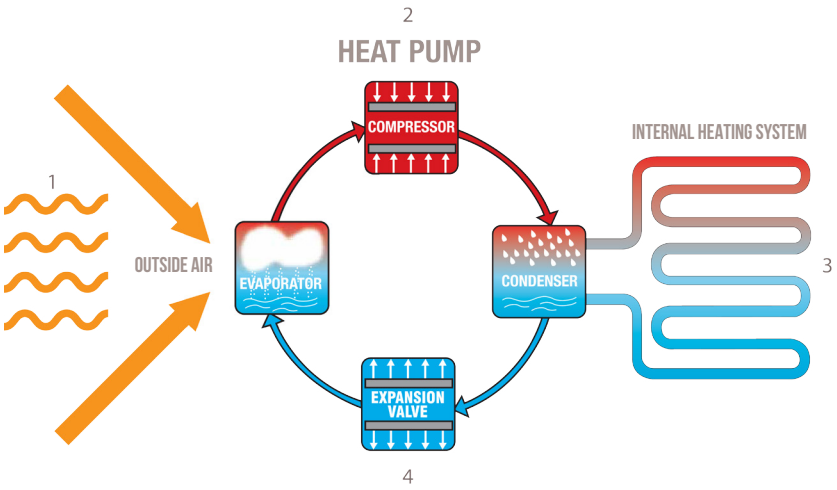
SHPC AIR-TO-WATER Heat Pump

GREEN CHOICE

Our impressive line of environmentally friendly offerings has now been expanded to include one of the most energy-efficient and innovative commercial products on the market.

The electric commercial heat pump water heater works great when there is a large demand for hot water. Applications requiring significant hot water usage will maximize energy savings for the shortest payback periods. Best of all, heat pump heaters are three times more efficient than standard electric water heaters and up to four times more efficient than conventional gas water heaters.



Common applications

- Commercial : Restaurant/Kitchens
- Institutional : Hospitals, Hotels, Schools, Resorts
- Residential : Villas, Apartments, Guest houses
- Industrial : Factories, Laundries

Technical Specifications			
Models		SHPC-006	SHPC-012

Hot Water Tanks

A. O. Smith is the market leading manufacturer of domestic hot water storage tanks in the USA. Our extensive selection has storage capacities from 80 gallons to 12500 gallons.

We have stocked standard sized jacketed and non-jacketed glass-lined storage tanks, but you can have yours built custom made, complete with jackets, insulation, special linings, manholes, hand holes, and lifting lugs.

Our single and dual coil indirect calorifiers are designed especially for renewable energy heating, to be used together with solar collectors and heat pump water heaters.

STA-RITE®

Pentair Water Pool and Spa® is the world's leading manufacturer of pool and spa equipment and accessories. Pentair's Sta-Rite® brand offers innovative products that make pool and spa ownership simpler, more enjoyable, and more energy efficient than ever before.

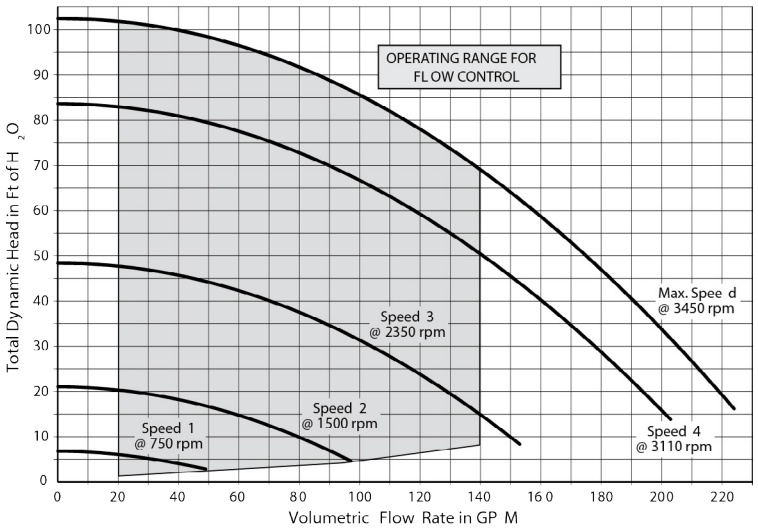
Intellipro XF VSF

GREEN CHOICE

IntelliPro XF VSF pump is the first variable speed and flow pump that adjusts to changes in flow system conditions to maintain its programmed flow rate. With the highest available performance and efficiency, it is perfectly suited for large and feature-rich pools with high flow demand.

3 Years Warranty

Model	Voltage	FLA	kW	HP	SF	SFHP	Port Size (NPT)
IntelliPro XF VSF	230	16	3.2	3	1.32	3.95	2.5 in. x 2.5 in. OR 3 in. X 3in.



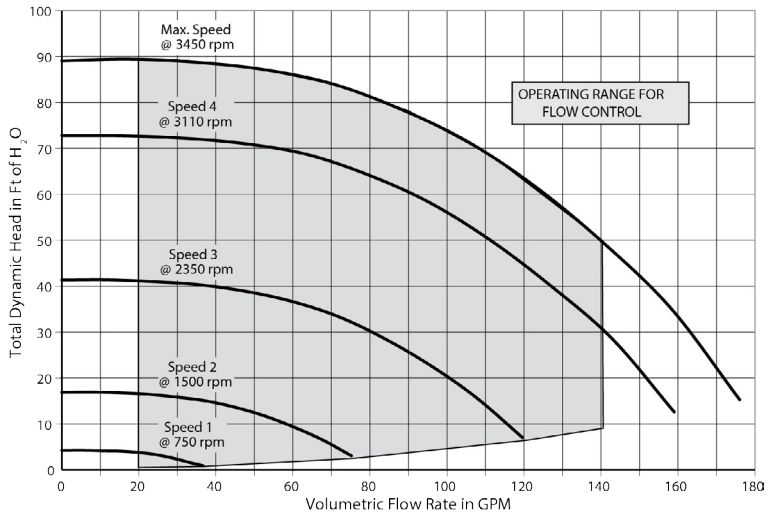
Intellipro VSF

GREEN CHOICE

IntelliPro VSF maintains its pre-programmed flow rate to run optimally throughout the entire filtration cycle. It's like having cruise control for your pump.

3 Years Warranty

Model	Voltage	FLA	kW	HP	SF	SFHP	Port Size (NPT)
IntelliPro VSF	230	16	3.2	3	1.32	3.95	2 in. x 2 in.



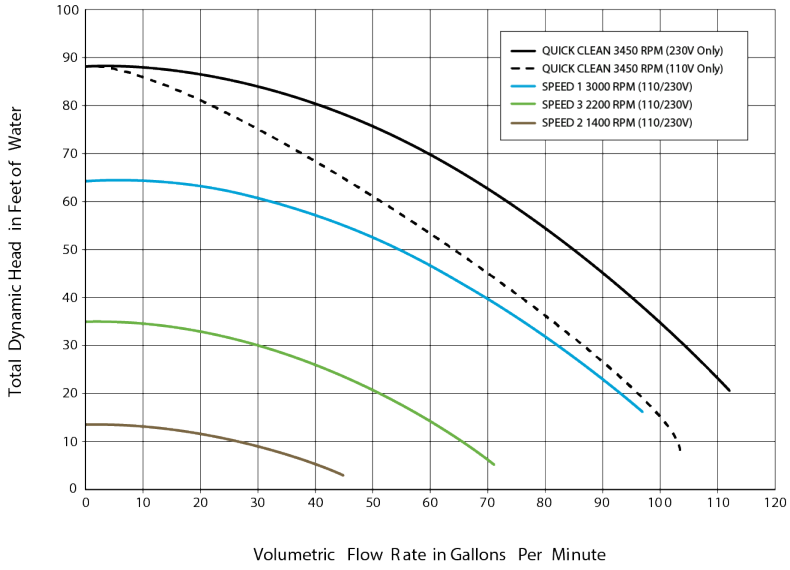
Supermax VS

GREEN CHOICE

The SuperMax VS Variable Speed Pump brings the remarkable energy cost savings of variable speed technology, reducing energy costs by up to 80%. It has an easy-to-read graphical display and a built-in timer.

2 Years Warranty

Model	Voltage	FLA	HP	SF	SFHP	Port Size (NPT)
Supermax VS	208-230	12.0-11.5	1.5	1.46	2.2	1-½"



Max-E-Pro XF

Max-E-Pro XF used the most advanced engineering tools available to elevate pool pump performance to the next level. The impeller design delivers a high level of precision concentricity for increased efficiency.

2 Years Warranty

Model	hp	gpm at 40ft head	FLA	Suction (in.)	Discharge (in.)	Legends

STA-RITE®

Sta-Rite Posiclear RP Cartridge Filters

GREEN CHOICE

Cartridge filters can filter up to 20 microns. They are easy to use and maintain. During maintenance, the cartridge can be cleaned by simple hosing. For longer maintenance-free operation, choose oversized filters. Oversized filters mean more time before you have to clean the filter. The simple way of cleaning cartridge filters also saves water, compared to the automatic backwash operation of the sand filter.

Model	Effective Filtration Area (Sq. Ft.)	Flow Rate	Turnover Capacity (In Gallons)			Inlet/Outlet (in.)	Diameter (in.)	Height (in.)	Vertical Clearance (in.)

Celatom® Diatomaceous Earth Filter Aid

The World's Choice for D.E. filter media

EaglePicher's Celatom® D.E. filter media is the ultimate D.E. filter aid for your swimming pool. Also known as "water polisher," this D.E. can filter debris as little as 2-5 microns. It can efficiently clean cloudy swimming pools and make it clear while reducing the need to use chemicals and disinfectants. This is the reason why after 50 years, Celatom® D.E. filter media is still the world's choice for D.E. filtration.

STA-RITE®

Sta-Rite Sand Filters

Sand Filters use silica sand, zeolite or glass media. They do not depend on the continuous use of D.E. powder to clear your swimming pool. During maintenance, a simple and convenient backwashing is done through the multiport valve of the filter.

The convenience, large capacity, and reduced operational costs are what makes sand filters the popular choice for commercial swimming pools.

Crystal-Flo II

ecoclear GREEN CHOICE

10 Years Warranty

EcoClear® is a new 100% recycled, environmentally-friendly media that lasts up to 3 times longer than traditional Silica sand. This product will save you money and give you a cleaner, healthier pool.

Features & Benefits

- Removes particles above 4 micron in size
- Discourages bacterial growth in filter tank
- Cost Benefits
- Reduced Backwashing
- Reduced water consumption by up to 25%
- Reduced Chemical use by up to 50%
- Strong and long lasting
- 100% Amorphous Fused Silicon Dioxide
- Outstanding performance
- 100% Recycled

Silica Sand

Zeolite

Silica sand, Zeolite, and Ecoclear Glass media are available. Silica sand can filter up to 20 microns in size while Zeolite can filter below 10 microns. Use Ecoclear Glass media for best filtration results with sand filters.

Unicel®

Replacement Filter Cartridges and Grid Elements

We have a wide variety of filter replacement cartridges and D. E. grid elements for common brands in the Philippines. Brands on stock include Sta-Rite, Pentair, Hayward, American Products, Jacuzzi, and Purex.

Pentair

EQ Commercial Swimming Pool Pumps

EQ Pump Series are all-plastic commercial grade pool pumps that are built specifically to deliver extraordinary performance for a wide range of commercial pool and water applications.

They are energy efficient, quiet, lightweight and corrosion resistant. It also has a unique impeller design that provides true breakthrough performance for a longtime.

Features

- Close-coupled for quiet, stable flow operation
- Clear Cam and Ramp™ Lid for added service convenience
- 6-inch suction and 4-inch discharge with strainer pot
- Compatible with Acu Drive™ XS Variable Frequency Drives
- NSF certified

Sta-Rite UltraTemp® Pool Heat Pump

- 100% pure titanium heat exchanger assures corrosion-free performance for extra long life
- Digital controls with dual thermostats offer precise temperature control for pool/spa combinations and avoid over-heating and energy waste
- Self-diagnostic controls monitor and troubleshoot heat pump operation to ensure safer, dependable operation
- Long-life, corrosion-resistant composite cabinet maintains its appearance for years

DID You Know?

Heat pumps can also chill water. Try the H/C model.

*HD option for Heavy Duty Cupro-Nickel Heat Exchanger

Jet-Flo Inline Electric Heater

- 12 kW heating capacity providing recovery of 40,945 Btu/hr
- 1.5 in. water connection
- 0 – 50°C dial adjustment temperature setting
- Heavy duty magnetic contactors
- Pressure switch activated at 5 psi to prevent dry firing operation

Jet-Flo H30-R1 Spa Heater

- 3kW / 230V / 13A
- For 400 ltr. Spa

Bio-UV O'Clear 25 Complete Pool Chemistry

- 100% automatic pool chemistry — perfectly balanced chlorine and pH level for pools up to 100,000 L
- Low salt requirement — 500 ppm compared to 3000 ppm or higher with other brands
- No risk of allergies
- No chlorine smell, no salt taste
- Reduced corrosion risk
- Long UV lamp life - 13,000 hours or about 3 years

Max. Flow Rate: 110 gpm
UV Lamp: 1 x 87W
Connection: 75 mm

Bio-UV Pool Sanitizers

- Neutralize microorganisms not affected by chlorine and salt
- Drastically reduce chemical use
- Prolongs pool life
- No more red eyes, dry skin or damaged hair
- No unpleasant chlorine smell
- Reduced corrosion risk
- Long UV lamp life - 13,000 hours or about 3 years

Model	Connection	Max. Flow Rate gpm @ 30mj/cm2	Amps	Lamp Wattage	UV Power

E-40	63mm	110	0.5A	110W	36.3W

IntelliChem® Chemical Controller

The IntelliChem Chemical Controller automatically monitors pool pH and sanitizing levels and delivers just the right amount of chemicals. Its built-in Langelier Saturation Index calculator lets pool owners know when the water is in or out of balance.

- Minimizes chemical costs by adding chemicals with precision and only when needed to eliminate waste
- No more manual handling of chlorine and acid
- Protects your pool equipment from corrosion caused when pH swings in and out of balance

Maytronics pH Drive

Automatic pH dosing system for maintaining your pool's pH water balance.

Flow rate: 110 ml/min
Power: 6W
pH range: 0-14 pH

maytronics mineralSwim™

EXPERIENCE THE DEAD SEA

Recreate the relaxing, natural, healthy pool experience that people have enjoyed for thousands of years at the Dead Sea. The Mineral Swim System combines the benefits of magnesium-rich Dead Sea minerals with the natural ozone-to-oxygen purification process, fully endorsed by AHAVA - one of the World's great natural skincare brands. Ideal for general skin hydration and helpful for skin conditions such as psoriasis and eczema, Mineral Swim will leave your skin feeling rejuvenated.

- Pool water inspired by nature
- Crystal clear water
- Stimulates hydration
- Relaxes muscles
- Detoxifies & regenerates the skin
- Compatible with any existing pool system

maytronics ozoneSwim®

EXCEPTIONAL POOL PURIFICATION - The Choice is Crystal Clear

- Reduce chlorine levels by up to 80%
- Sensitive & Safe Sanitation
- Crystal Clear & Odour-Free
- Tried & Trusted
- Fewer chemicals required
- Easy on the Eye, Soft on the Skin
- Save Time, Money & Maintenance
- Healthier Pool Water

OZONE

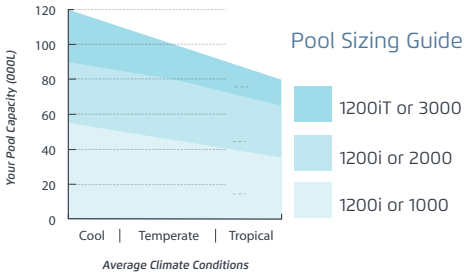
Add Ozone to your current system

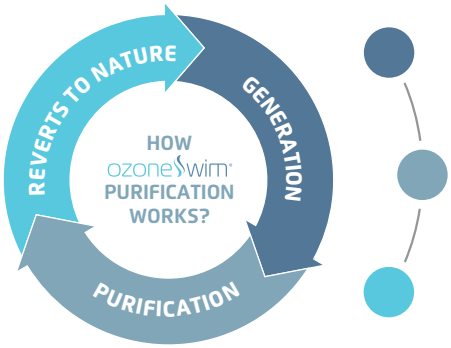
The 1200i Series works in conjunction with existing salt chlorinators, chemical dosing systems and tablet feeders.

OZONE SYSTEM

Mineral/Salt + Ozone = Total Solution

The 1000, 2000 & 3000 Series is designed to replace existing sanitisation systems. These units have the benefit of both salt/mineral Chlorination and Ozone purification.





1. GENERATION

Oxygen converted to pure Ozone

2. PURIFICATION

Ozone neutralises harmful contaminants

3. REVERTS TO NATURE

Ozone converts back to natural pure Oxygen, for a softer cleaner pool

maytronics | Dolphin GREEN CHOICE

Exceptional Experience

Dolphin robotic pool cleaners deliver automated, high-performance pool cleaning efficiently and effectively. Dolphin have consistently been at the forefront of innovation. With decades of expertise in automatic pool cleaners, every Dolphin combines advanced technologies with proven reliability so you can enjoy a constantly clean pool with little effort. Available for both residential and commercial pools.

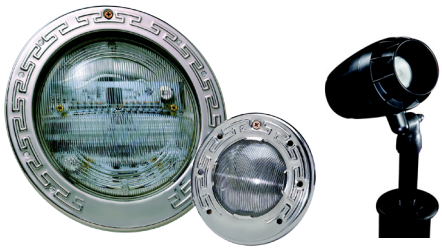
Swimming pools are the focal point of your backyard. With Lighting and Water Effects you can add to the peace and tranquility of your poolside experience by allowing the pool to sparkle with personality.



IntelliBrite® 5G LED Lighting

The Intellibrite family of pool, spa and landscape lights gives you choice and control to get the ambiance that you love.

- Pool Color: 26W 12V
- Pool White: 40W , 48W, 55W depending on model
- Spa Color/White: 18W 12V
- Landscape Color: 15W 12V

IntelliBrite® Controller

With the Intellibrite controller, dazzling light shows are just a single push of a button away. Choose from 12 different colors and shows to set the mood. Intellibrite Controller works with Intellibrite 5g pool, spa and landscape lights as well as Globrite and MagicStream laminars.

GloBrite® Underwater LED Lights

GloBrite Shallow Water LED Lights are suitable for the shallow ends of your pool. They can be placed in as little as 4 in. of water horizontally or vertically.

- Color/White: 15W 12V
- Compatible with Intellibrite Controller

MicroBrite® LED Lighting

Give your pool the ultimate lighting upgrade. Pentair MicroBrite Color and White LED Lights provide exceptional brilliance, lighting uniformity and amazing colors. For new pool and spa designs, their compact size delivers the freedom to add dynamic lighting in places never before possible. Let your imagination take you to brighter places!

- 12V
- 150' Cord

Other Pool, Spa and Fountain Lights

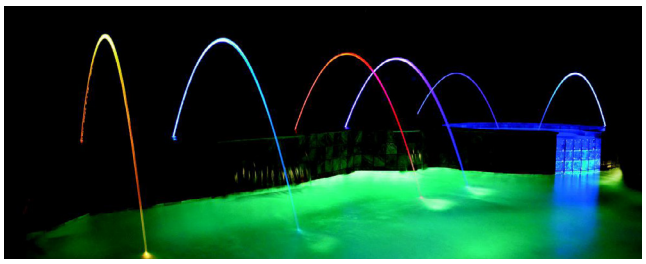
MagicStream® Laminars

MagicStream® laminars create totally clear, uniform arcs of moving water that originate from either your pool deck or surrounding landscape. At night, these translucent streams are brilliantly colored with an LED light source. The result is a water effect that adds an elegant bit of entertainment to your poolscape.

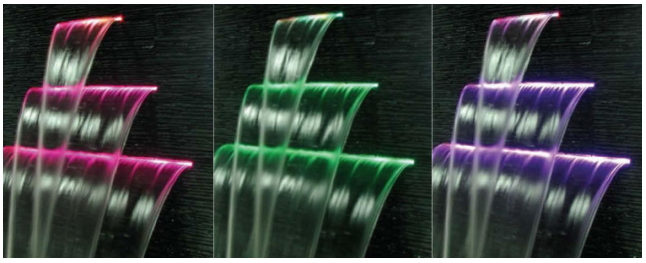
- 16W 12V
- Compatible with Intellibrite Controller



Water Descents

Create relaxing waterfalls that fall into the pool. Optional RGB LED 12V lighting gives color to the waterfall.

- 300mm: 12V 4W
- 600mm: 12V 8W
- 900mm: 12V 12W
- 1200mm: 12V 17W



ColorVision Bubbler

ColorVision Bubbler combines GloBrite with the ColorVision Niche to create fountain-like water movement.

Deck Jet Water Effects

The standard Deck Jet comes with five interchangeable and adjustable water effect eyeballs. Streams can reach up to eight feet.

MagicStream Deck Jet II are installed flush and out of sight, allowing you to create different arc effects appearing from the pool deck. Height is adjustable up to 6 feet and water direction is adjustable 360 degrees.

Wave Ball

WONDERFUL WAVES

- Energy-efficient—uses maximum 4hp to produce wavesUnique and Fun Using resonance frequency to build up waves adding excitement to your pool experience
- Safe and Controlled—Can be configured easily, creating natural waves that are safe for children
- Customizable—With different colors and other added features to choose from

Ideal for pool 100m2 or greater, the Wave Ball is a floating sphere adorning your swimming pool that safely generates artificial waves.

The Wave Ball can be set to generate different kinds of waves, from slow and relaxing waves to fast agitated waves, and with height up to about 1 meter high.

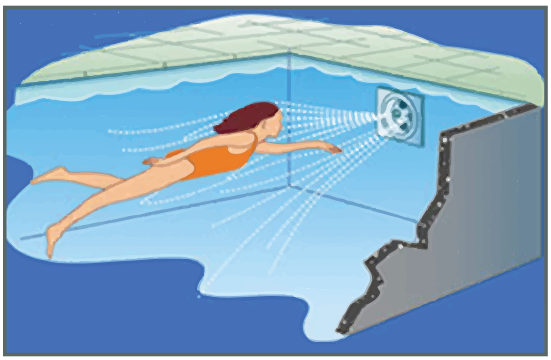
BADU®

Burn calories, strengthen muscles, and soothe body aches by swimming against a current. Control the degree of your preferred workout—building your body, mind, and spirit along the way. Aquatic exercise is one of the best exercises you can do. Gentle and soothing swimming has historically been a superior method for staying in shape. Now you can convert a part of your pool to a space-saving athletic corner and enjoy all the benefits of this exceptional water therapy. The BaduJet counter swim units are a great addition to your fitness regimen, best for therapeutic and aquatic wellness areas.

Submerged Counterswim Units



BADU JET Smart

The compact submerged unit is installed in the pool wall. The direction nozzle control and stepless regulation of the water and air flow allow you to adapt the unit to suit your needs—whether underwater massage, bubble bath, wavepool and others.

- Flow Rate: 45 m3/hr (198 gpm)
- Electrical: 1.6 kW 1PH 60Hz

Wave

Badu Jet Wave is an instant classic counter swim unit that brings waves in your pool. The Badu Jet Wave is powerful enough for the advanced swimmer and brings fun or exercise.

- Flow Rate: 54 m3/hr (237 gpm)
- Electrical: 2.2 kW 1PH 60Hz

reddot design award

vogue

A Red Dot Design awardee, Badu Jet Vogue brings elegant design in the world of fitness swimming. The Badu Jet Vogue transforms a section of your pool into a water treadmill designed for the advanced swimmer.

- Flow Rate: 54 m3/hr (237 gpm)
- Electrical: 2.2 kW 1PH 60Hz

primavera

Badu Jet Primavera is the most powerful submerged counter swim unit. This is the perfect fit for the sports enthusiast looking for a healthy dose of swimming exercise.

- Flow Rate: 75 m3/hr (330 gpm)
- Electrical: 3.0 kW 1PH 60Hz

Over-the-Wall Counterswim Units

active

Luxury and relaxation becomes more affordable, even with the Badu Jet's reputation for reliability and innovation. Badu Jet Active Over-the-wall counter swim unit converts a small part of your pool into a personal excercise machine. Badu Jet Active is equipped with a swivel jet nozzle and bubble bath function for more relaxation options.

- Flow Rate: 20 m3/hr (88 gpm)
- Electrical: 0.75 kW 1PH 60Hz

BADU® Jet riva

Badu Jet Perla and Riva are designed for the active lifestyle. By placing them over a small segment of the pool wall, you can convert a small part of your pool into a continuous water treadmill. They feature an adjustable swivel jet that creates counter pressure or a relaxing underwater massage.

Perla
- Flow Rate: 54 m3/hr (237 gpm)
- Electrical: 1.6 kW 1PH 60Hz

Riva
- Flow Rate: 54 m3/hr (237 gpm)
- Electrical: 2.2 kW 1PH 60Hz

Accessories

Wireless Remote

Massage Accessories for floor and wall connection for a full body massage experience.

Underwater mirror allows you to check your stroke or swimming form.

WHY SETTLE FOR JUST A BATHROOM?

CREATE A COMPLETE WELLNESS ZONE AT HOME!

Water, air, heat and light can work wonders for your body, and your mind. Create a Complete Wellness Zone in your home and heal the harm inflicted on you everyday by high-stress city life. Come home to the soothing power of Hydromassage, Airpool jets, dry heat, cleansing steam, Chromotherapy lights and much, much more. All backed by the assurance of Jaquar, India's most trusted bath brand.*

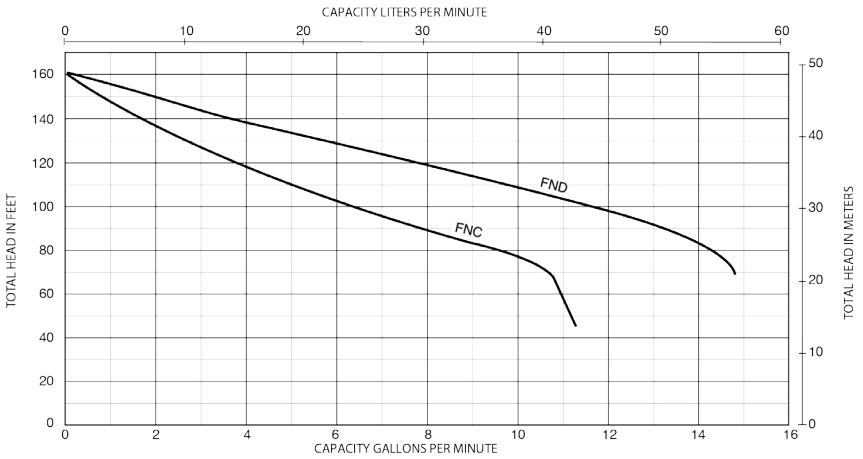
SHALLOW WELL JET PUMPS

FN Series

Cast Iron Shallow Well Jet Pumps

- Max. Liquid Temperature: 140°F
- FNC Max. Inlet Pressure: 60 PSI
- FND Max. Inlet Pressure: 50 PSI
- Max. Inlet PSI + Pump Discharge PSI: Not to exceed 100 PSI
- Body and Base: Close-grained cast iron
- Nozzle: High-strength polycarbonate
- Venturi: Polycarbonate
- Impeller: Noryl®
- Diffuser: Reinforced polypropylene
- Shaft: One-piece threaded stainless steel

PUMP PERFORMANCE

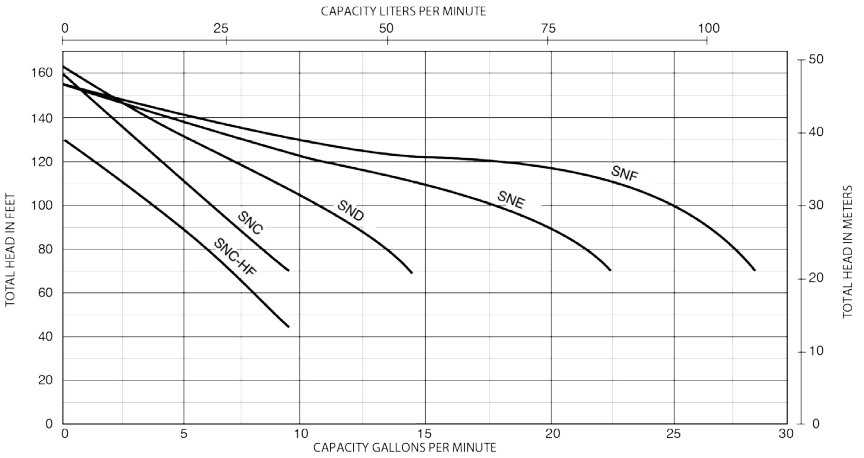


SN Series

Cast Iron Shallow Well Jet Pumps

- Max. Liquid Temperature: 140°F
- Max. Inlet Pressure: 50 PSI
- Body: Close-grained cast iron
- Nozzle: High-strength Lexan®
- Venturi: Lexan
- Impeller: Noryl®
- Diffuser: Reinforced polypropylene
- Shaft: One-piece threaded, 416 grade stainless steel
- Base: Steel, 12 gauge

PUMP PERFORMANCE

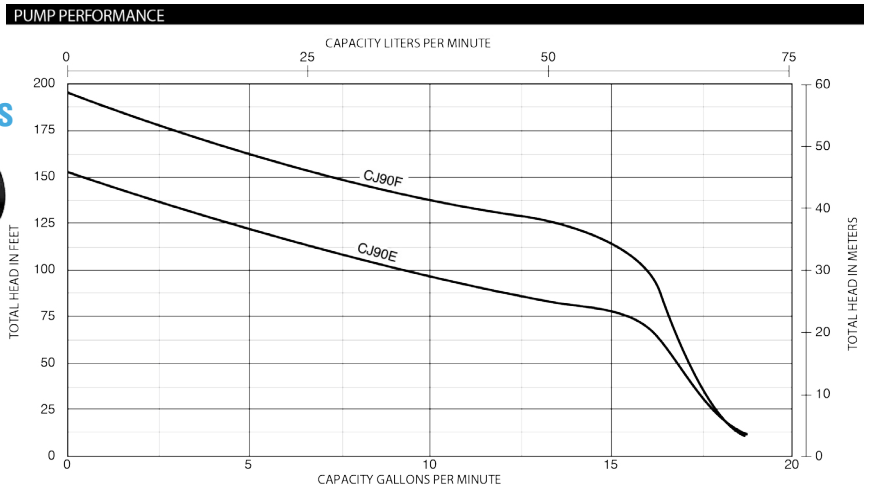


CJ Series

Stainless Steel Shallow Well Jet Pumps

- Maximum Liquid Temperature Limits: 122°F (50°C)
- Max. Inlet Pressure: 50 PSI
- Body: 304 Stainless steel
- Jet Assembly, Diffuser, Impeller: Noryl®
- Shaft: One-piece threaded, 416 grade stainless steel
- Base: Polypropylene

PUMP PERFORMANCE



Standard Features for All Shallow Well Jet Pumps

- Built-in Jet: High-strength nozzle and venturi for maximum resistance to corrosion and abrasion; Clean-out plug provided
- Mechanical Shaft seal: Precision lapped and highly polished carbon-ceramic, stainless steel construction
- Balanced Rotor: Die-cast under high pressures for uniform performance and greater efficiency, dynamically balanced
- Heavy-Duty Ball Bearings: Shielded permanently lubricated bearings, extensively tested to ensure extended life and smooth, quiet operation
- Pump and motor shaft: Stainless steel for maximum corrosion resistance; one-piece threaded shaft for positive impeller drive and alignment
- Dust-proof cover
- Pressure Switch: Adjustable cut-in and fixed differential (20 PSI)

FL Series

Cast Iron, Self-priming Convertible Jet Pumps

- Body and Base: Close-grained cast iron
- Impeller: Lexan®
- Diffuser: Reinforced polypropylene
- Shaft: One-piece threaded 416 stainless steel
- Pressure Switch Pre-Set: 30–50 PSI
- Suction Ports: Drive-over-Suction

ProJet™ HL and SL Series

Cast Iron, Self-priming Convertible Jet Pumps

- Body and Seal Plate: Close-grained cast iron
- Impeller: High-strength Noryl®
- Diffuser: Reinforced polypropylene with brass wear ring
- Shaft: One-piece threaded 416 stainless steel
- Base: Steel, 12 gauge
- Max. Liquid Temperature: 140°F
- Max. Inlet Pressure: 50 PSI
- Pressure Switch Pre-Set: 30-50 PSI
- Suction Ports: “Suction-over-Drive”
- Pressure Gauge Included for HL Models

Standard Features for Self-priming Convertible Jet Pumps

- Quality Construction: Close Grained cast iron body and base, specially treated for corrosion resistance
- Built-in Jet: High-Strength polycarbonate nozzle and venturi for maximum resistance to corrosion and abrasion; Clean-out plug provided for ease of service
- Precision-Molded Diffuser: Pump primes faster, handles more air, with multi-port, precision-molded, reinforced polypropylene diffuser
- Mechanical Shaft seal: Precision lapped and highly polished carbon-ceramic, stainless steel construction
- Dynamically Balanced Rotor: Die-cast under high pressures for uniform performance and greater efficiency
- Heavy-Duty Ball Bearings: Shielded permanently lubricated bearings, extensively tested to ensure extended life and smooth, quiet operation
- Pump and motor shaft: Stainless steel for maximum corrosion resistance; one-piece threaded shaft for positive impeller drive and alignment
- Dust-proof cover: All electrical components are protected from dirt, dust and insects by a dust-proof canopy

MS Series

Cast Iron Vertical Deep Well Jet Pumps

- Body: Rugged cast iron
- Pump and Motor Shaft: 416 stainless steel
- Impellers: Noryl®
- Diffuser: Close-grained cast iron

Features

- Automatic Pressure Regulator: Faster acting and quieter design eliminates “hunting” for correct drive pressure. New, improved stem and guide are precisely molded to assure efficient, trouble-free performance on all deep wells
- Quality Construction: Close-grained cast iron pump body and base are specially treated to resist corrosion
- Noryl Impellers: Precision-molded for perfect balance
- Pressure Switch: High quality. Differential and cut-in/cut-out pressure settings are adjustable
- Mechanical Shaft Seal: Precision-lapped and highly polished carbon-ceramic, stainless steel construction
- Dustproof Cover: All electrical components are protected from dirt, dust and insects by a dustproof canopy
- Dynamically Balanced Rotor: Rotor is diecast under high pressures for uniform performance, greater efficiency
- Heavy-Duty Ball Bearings: Permanently lubricated sealed bearings are extensively tested to ensure extended life and smooth, quiet operation
- Pump and Motor Shaft: Stainless steel for maximum corrosion resistance; one-piece threaded shaft for positive impeller drive and alignment

HS Series Signature 2000

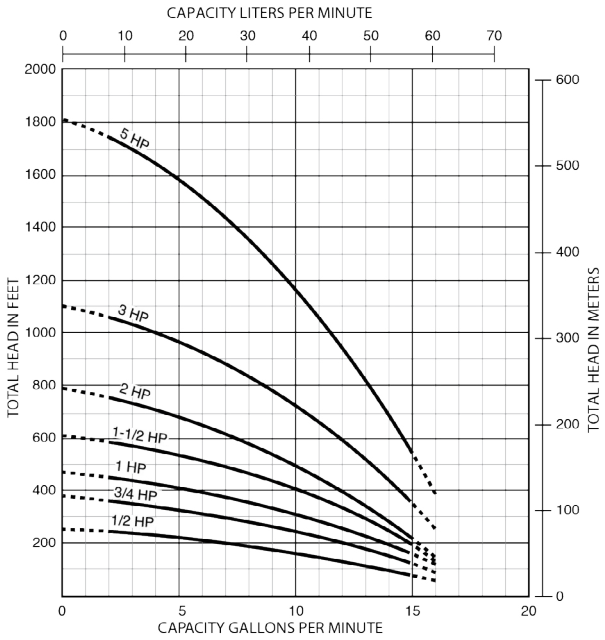
Stainless Steel Sumersible Pumps

- Shell: Stainless steel
- Diameter: 3-⅞”
- Discharge: Stainless steel
- Discharge Bearing: Nylatron®
- Intermediate Bearing: (On larger units) polycarbonate, nitrile rubber and stainless steel
- Impellers: Acetal
- Diffusers: Polycarbonate
- Suction Caps: Polycarbonate with stainless steel insert
- Thrust Pads: Proprietary spec
- Shaft and Coupling: Stainless steel
- Intake: Stainless steel
- Intake Screen: Polypropylene
- Cable Guard: Stainless steel
- Check Valve: Acetal
- Agency Listings: CSA

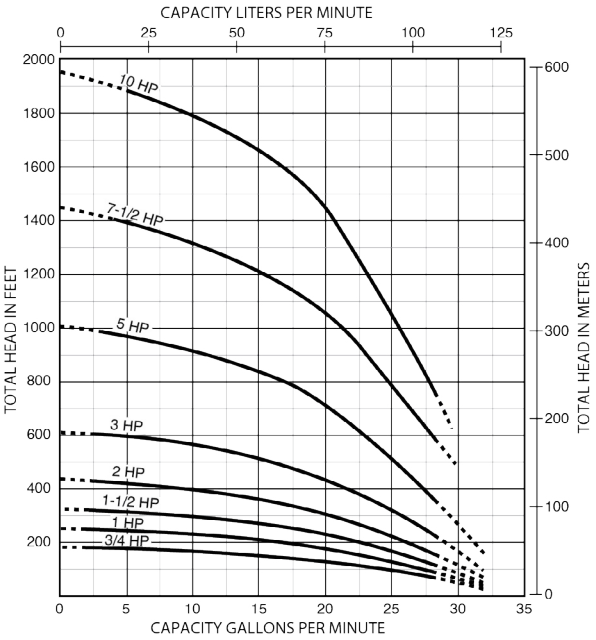
Features

- SignaSeal™ Staging System – Harder-than-sand ceramic wear surface and floating impeller design greatly reduces problems with abrasives, sand lock-up and running dry
- Discharge and Intake – 300 grade stainless steel for durability in aggressive water
- Discharge Bearing – Exclusive self-lubricating Nylatron® bearing resists wear from sand
- Shaft – Positive drive from 7⁄16” hexagonal heavy-duty 300 grade stainless steel
- Coupling – Stainless steel press fit to pump shaft
- Shell – Highest grade, heavy-walled stainless steel
- Hardware – All screws, washers and nuts are 300 grade stainless steel
- Check Valve–Durable internal spring-loaded check valve
- Cable Guard – Stainless steel guard protects motor leads
- Intake Screen – Corrosion-proof

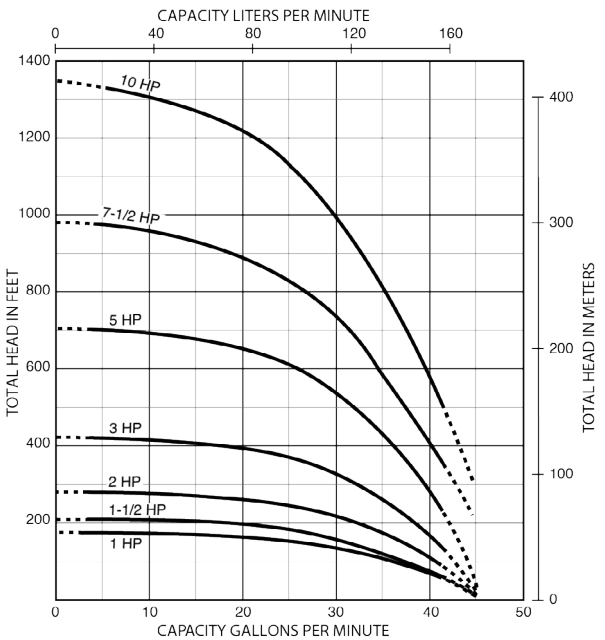
PUMP PERFORMANCE – 10 GPM



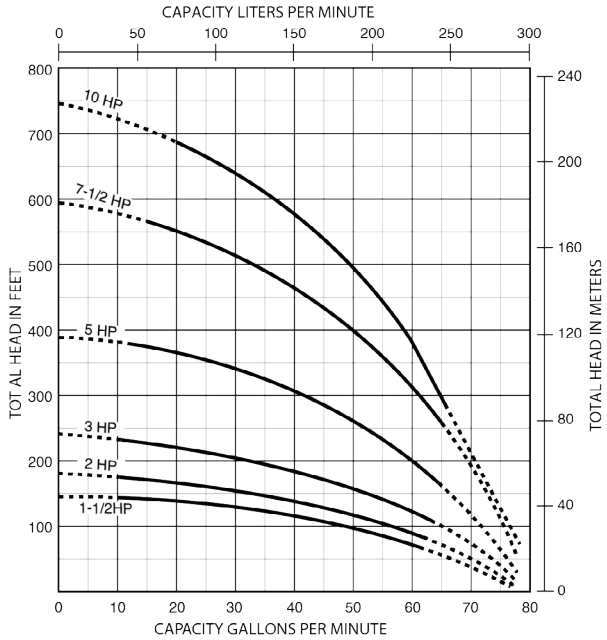
PUMP PERFORMANCE – 20 GPM



PUMP PERFORMANCE – 30 GPM



PUMP PERFORMANCE – 50 GPM



J/JB Series

General Purpose Centrifugal Pumps

- Maximum Case Pressure. 125psi
- Body and Seal Plate: Close-grained cast iron
- Base: Steel 12 gauge
- Impeller: J Series – Noryl
- Impeller: JB Series – Silicon bronze
- Shaft: 416 stainless steel
- Mechanical Seal: Carbon/ceramic, Buna-N

Features

- Heavy-duty motors and four position discharge
- Easy Serviceability: All models include replaceable wear ring and feature back pull-out design
- J Series with Noryl Impellers: Working temperatures to 140°F
- JB Series with Silicon Bronze: Rated for temperatures to 225°F

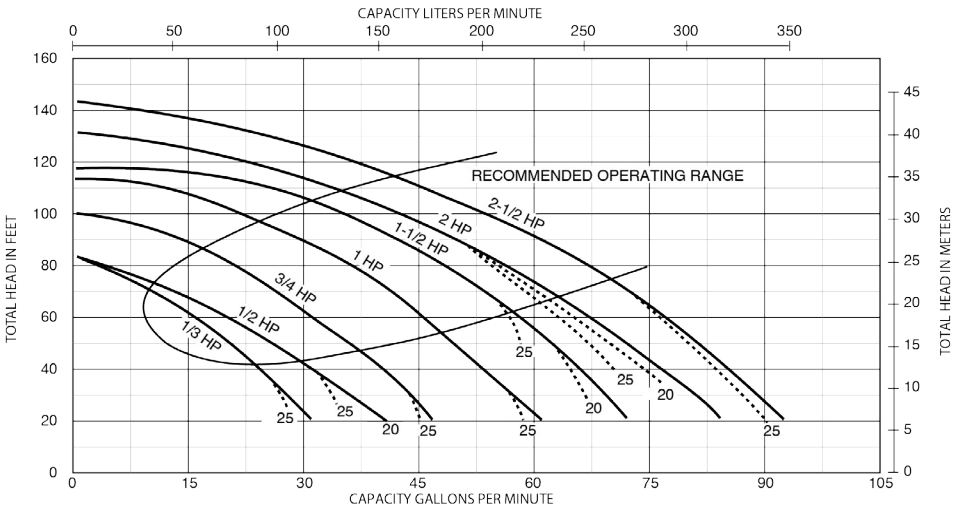
PUMP PERFORMANCE: HIGH HEAD



NOTE: Dotted lines indicate performance reduction at high suction lift.

DS2 Series

Self-priming Centrifugal Pumps

- Body and Base: Close-grained cast iron
- Impeller: Lexan® or Noryl®
- Diffuser: Polypropylene
- Shaft: Stainless Steel

Features

- Rugged Construction: Heavy-Duty Motors, easy service design
- Easy Serviceability: Normal wearing parts are easily accessible for service and replacement, without disturbing piping or mounting.
- Heavy-Duty Motors: Designed for continuous operation. Capacitor start, will not cause electrical interference with TV or other appliances. Nationally known motors have ball bearing. stainless steel shaft, For single and three phase operation, 3450 RPM.

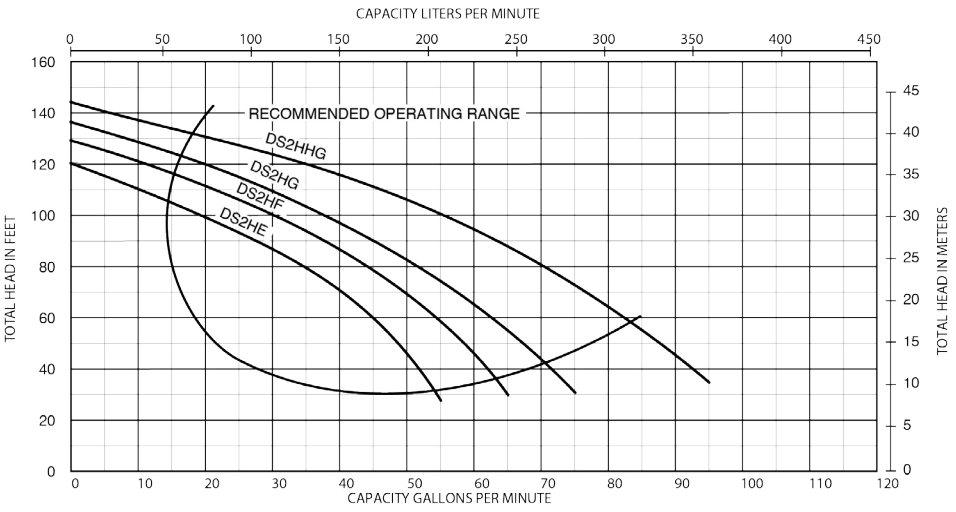
PUMP PERFORMANCE



D Series

Self-priming Centrifugal Pumps

- Body and Base: Close-grained cast iron
- Impeller: Noryl® on 1 through 2-½ HP, bronze on 3 and 5 HP
- Diffuser: Cast iron
- Shaft: 1 through 2-½ HP: 416 stainless steel; 3 and 5 HP: Carbon steel inside removable shaft sleeve of stainless steel.
- Max Inlet Pressure: 20 PSI
- Max Discharge Pressure: 100 PSI
- Max Liquid Temperature: 60°C/140°F
- Max Ambient Air Temperature: 40°C/104°F

Features

- Easy Serviceability: Normal wearing parts are easily accessible for service and replacement, without disturbing piping or mounting
- Heavy-Duty Motors: Designed for continuous operation. Capacitor start, will not cause electrical interference with TV or other appliances; Nationally known motors have ball bearing, stainless steel shaft; For single and three-phase operation, 3450 RPM

BERKELEY® Type B Centrifugal Pumps

Berkeley's Type B close-coupled end-suction centrifugal pumps are ideal for most applications requiring high performance, easy maintenance.

- Cast iron construction with unique back pull-out
- NEMA motors: efficient, low maintenance & quiet performance
- High quality, self-lubricating mechanical shaft seal with corrosion resistant metal parts provides maintenance-free operation and maximum abrasion resistance without leaking
- Motor bracket is precision machined for proper component sealing
- Replaceable stainless steel shaft sleeve provides maximum corrosion resistance and protects shaft from wear
- Discharge may be rotated to any of four positions

Jet-Flo Inverter Pump System

Features

- All-in-one booster pump set / stainless steel multi-stage pump, valve, pressure tanks, and inverter (VFD)
- User-adjustable Constant Water Pressure: No water hammer in piping system
- Compact Design saves space: Low noise operation to uplift standard of living
- Saves Electricity Cost: Inverter (VFD) will change motor speed depending on water volume consumption
- Dry-run Detection: Protects motor from burnout if water shortage occurs
- Rust-free Water: Main pump parts are rust-free material to ensure safe and clean water supply

Operating Conditions

- Ambient Temperature: 0~+40°C
- Liquid Temperature: 0~+60°C
- Relative Humidity: Max. 85 %(RH)
- Before using the pump, be sure the inlet pressure setting is lower than the factory preset activation point
- Water Quality: Drinking water, tap water, or other non-corrosive clean liquids without abrasives

Applications

- Automatically boost water pressure to the house, villa, apartment, restaurant, school, beauty shop, etc.
- Automatically boost water pressure to garden sprinkler, heater, toilet, washing machine, reverse osmosis device.

What is an Inverter or Variable Frequency Drive?

An Inverter drive or Variable Frequency Drive (VFD) is a frequency or speed controller that allows the user to control the speed of pumps and motors to rotate at varying speeds depending on the demand of the system or process that it carries out.

Why use an Inverter Drive?

Without the inverter drive your pump or motor will either be at full speed or switched off. Its main purpose is to control a process accurately. Take water boosting systems for example, controlling the speed of the pump ensures constant pressure anytime.

Compared with traditional water tower and high tank way, constant pressure ensures the required pressure and flow rate by controlling the speed of the pump as necessary. This translates to significant energy savings and increased life expectancy.

Benefits of using an Inverter Drive?

- Energy savings
- Improved control
- Reduced wear and less maintenance
- Reduced stress on pipework, valves and associated systems
- Better motor protection

Pump Controls and Accessories

Electronic Pump Controls

Pressure Switch

Flow Switch

Tank Volume Control

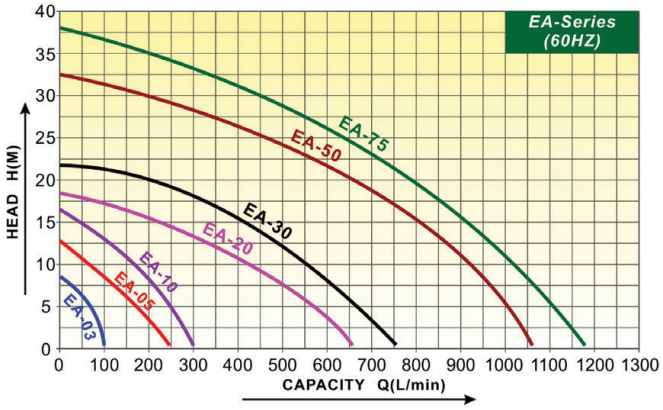
Float Switch

Pressure Gauge

EA Sump Pumps

Features

- Dry motor with overload protector
- Superior abrasion resistant double mechanical seal
- Oil seal mounted outside of seal chamber stops solids gathering around seal faces
- Equipped with SUS304 strainer to prevent impeller from being blocked or damaged by sewage or solids



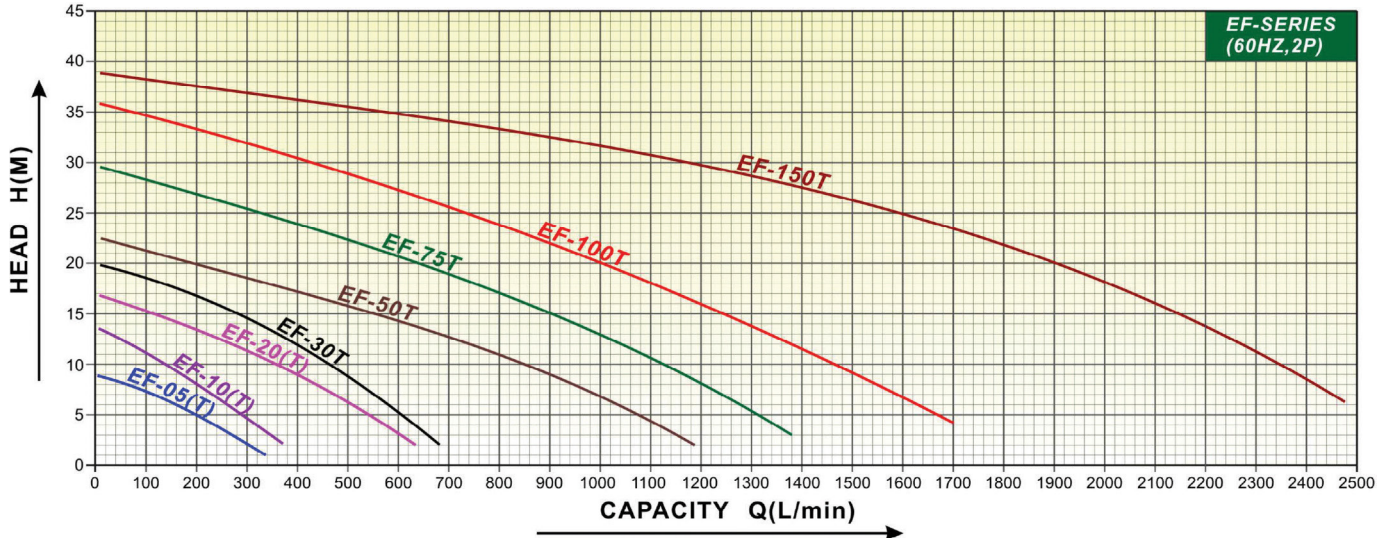
EF Sewage Pumps

Features

- Non-clogging impeller minimizes abrasives wear and allows large solid passage
- Dry motor with overload protector
- Superior abrasion resistant double mechanical seal
- Oil seal mounted outside of seal chamber stops solids gathering around seal faces

Applications

- Wastewater drainage from all industries
- Sewage drainage from hotels, restaurants, schools, malls, and public facilities
- Fishery, animal husbandry, stock farm, piggery, fecal sewage tank in wastewater treatment plant
- Drainage of wastewater containing fibrous additives from leather factory, dyeing factory and food processing factory



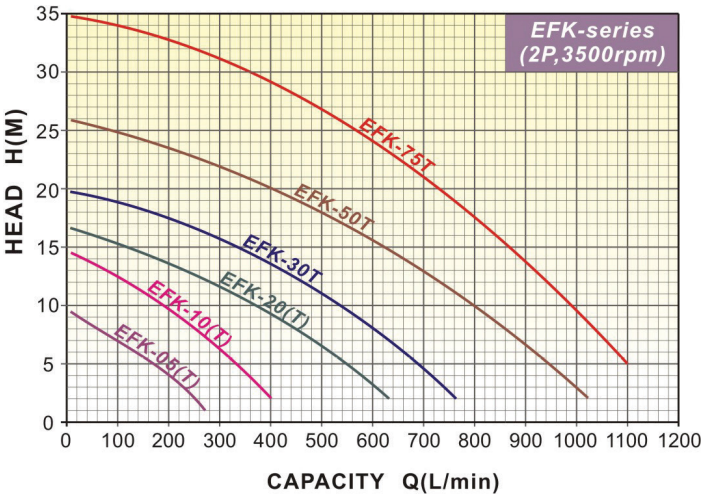
EFK Submersible Cutter Pumps

Features

- Impeller is tipped with tungsten cutter to cut off hard objects and prevents impeller from being damaged by hard articles
- Epoxy resin cable base, 2p dry motor, C3 deep groove bearing, dual mechanical seals, auto-cut protector

Applications

- Sewage drainage from hospitals, schools, husbandry, buildings, stock farm, plants, subway tunnel, etc.
- Dewatering wastewater containing hard objects like sticks, excrement, tiny gravel, etc.



Innovation has a name.

A. O. Smith Diaphragm Pump Tanks

Features

- Multiple Head Construction adds structural strength
- Permanently Bonded Interior Epoxy Coating
- Durable Butyl Diaphragm ensures long life
- Positive Lock Retention System eliminates air loss or water leaks in tank
- Electrostatic Powder-coated Exterior for maximum sunlight (UV) resistance with Zinc Phosphate Undercoat for highest corrosion resistance
- UL Listed, NSF/ANSI 61 Certified
- Working Pressure: 100 psi

Pre-Pressurized Diaphragm Operation

A. O. Smith export pump tanks are designed for installation flexibility and years of trouble-free service. Smooth, dependable diaphragm design and operation provides precise control of system operation cycles. Free-standing and in-line vertical tanks are available, as well as horizontal tanks with universal pump mounting bracket. Every A. O. Smith tank is made in the U.S.A.

Higher Drawdown Than Competition!

The industry's most popular "standard" tank size is the 44-gallon. A. O. Smith offers 52-gallon tanks in the same price range. A 52-gallon tank delivers 18% higher drawdown than standard!

In-Line Tanks

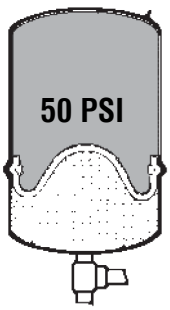
In-Line Series tanks, available in 2, 4.6, and 7.3-gallon sizes and are designed to be supported by system piping.

Pre-Pressurized Pump Tank Operation Cycles

Delivery Cycle
Pump remains shut off while air pressure in top chamber forces diaphragm downward, delivering water to system.

Start-up Cycle
Diaphragm is pressed against the bottom of the chamber.

Fill Cycle
Water is pumped into the reservoir, which forces the diaphragm upward into the air chamber.



Hold Cycle
Pump-cutoff pressure is attained. Diaphragm reaches its uppermost position. Reservoir is now filled to its rated capacity.

STA-RITE®

Sta-Rite Pro-Source Composite Fibrewound Tank

Features

- Rugged Fiberglass-wound Outer Shell
- Replaceable Heavy-gauged PEU Air Cell
- HDPE Inner Liner blocks UV energy
- 300-Grade Stainless Steel Connection
- Top-Mount Access for easy servicing
- Easy and Light Installation
- Rotatable Base with Quick-Connect
- NSF/ANSI 61 Certified
- Working Pressure: 125 psi
- Suitable for installation near sea coast

Our line of pressure tanks are captive air types that completely separate air from water. These designs have several advantages over the conventional galvanized iron or stainless steel tanks:

- Waterlog is eliminated - Less Maintenance
- Durability
- Water quality – Water is contained in NSF-approved membrane or tank lining
- Space Saving – Full capacity drawdown means smaller tanks for the same capacity as conventional tanks

WellForce Membrane Tanks

Features

- Replaceable Membrane
- High Quality Tiered EPDM Membrane
- Stainless Steel Flange Cover
- Stainless Steel Connections
- Built-in Air Pressure Gauge for 100 L and above
- Epoxy powder paint
- Reinforced Legs
- Max. Operating Pressure: 10 Bars (16 and 25 Bars as options)
- Pre-Charge: 4 bars
- Tanks CE 97/23 Certified
- Membrane Certified under: DIN 4807-3, NSF-61, WRAS, BS-6920
- Operating Temperature: EPDM: -20°C to 100°C (-4°F to 212°F); Butyl: -10°C to 70°C (-4°F to 158°F)

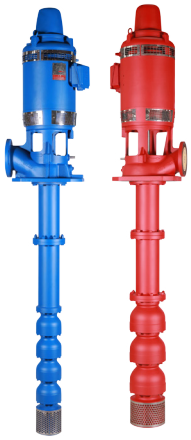
WNR Vertical Turbine



Wellforce WNR vertical turbine series can be used as fire pump or transfer pump in commercial and light commercial environment.

Flow Rate: Up to 2400 m3/hr (10.5k gpm)
Head: Up to 175m (575 ft.)
Motor: Vertical Hollow Shaft: 7.5 - 750 Hp

Evergush Fire Pump

Evergush fire pump is an all-in-one fire pump assembly that includes the main pump, motor, control panel, priming tank, pressure tank, flow meter, gate valves, check valves, etc. It's assembled on a skid and is easy and convenient to install.

Pool Chlorine Guide

Directions: For new or newly-refilled pools, add 10 oz. of chlorine per 10,000 gallons of pool water. Then run the filtration system for 24 hours. Adjust ph to 7.4 - 7.6 and test for chlorine residual. Do not allow bathers to swim when chlorine residual is above 2.00 PPM. Then simply follow the chlorine dosage shown below.

Superchlorination: Should pool water appear cloudy or dirty, add 20 oz. of chlorine concentrate per 10,000 gallons, allowing the pool filter to run so as to turn the pool water over in the pool. This process should be repeated until the pool water is clear and sparkling. Normal chlorination is not necessary during this process. Do not allow bathers when chlorine residual is over 2.00 PPM.

Daily Dosage		
Pool Capacity (US Gal)	Unstabilized Pool Water	Stabilized Pool Water
5000	⅛ kg	1⁄16 kg
10000	1⁄6 kg	1⁄12 kg
15000	¼ kg	⅛ kg
20000	⅖ kg	⅕ kg
25000	½ kg	¼ kg
50000	1 kg	½ kg

Managing PH Level

Raising PH With Soda Ash (WHEN PH LEVEL IS UNDER 7.4-7.6, ADD THIS AMOUNT OF SODA ASH THEN RETEST.)							
PH \ Gallon	1000	5000	10000	15000	20000	25000	50000
7.2 – 7.4	1⁄24 lbs	1⁄12 kg	1⁄6 kg	¼ kg	⅓ kg	½ kg	1 kg
7.0 – 7.2	1⁄20 lbs	⅛ kg	¼ kg	⅓ kg	½ kg	⅔ kg	1⅛ kg
6.6 – 7.0	1⁄12 lbs	1⁄6 kg	⅓ kg	½ kg	⅔ kg	1 kg	2 kg
Under 6.7	⅛ lbs	¼ kg	½ kg	⅔ kg	1 kg	1⅛ kg	2 ¼ kg

Lowering PH with Dry Acid / Sodium Bisulfate (WHEN PH LEVEL IS OVER 7.6, ADD THIS AMOUNT OF ACID THEN RETEST.)							
PH \ Gallon	1000	5000	10000	15000	20000	25000	50000
7.6 – 8.0	0.2 oz	1 oz	2 oz	3 oz	4 oz	5 oz	10 oz
Over 8.0	1 – 1.5 oz	2 – 3 oz	4 – 6 oz	6 – 9 oz	8 – 12 oz	10 – 15 oz	12 – 18 oz

Salt Requirement When Using Chlorine Generator

For Residential (small/medium bather load): 0.5 gr/hr for every 1 m³ pool
(considering running time 8hrs / day)
For Commercial (high bather load): 1 gr/hr for every 1 m³ pool
(considering running time 24hrs/day)

Examples:

1. Resort commercial pool size 400m³, you will need 1 gr/hr x 400 = 400 gr/hr. You can use 9 unit of SM45.
2. Private house pool size 60m³, you will need 0.5 gr/hr x 60 = 30 gr/hr. You can use 1 unit \ SM35

To raise		How much salt to add
1 ppm	=	1 gr / m3
1000 ppm	=	1 Kg/m3
2000 ppm	=	2 Kg/m3
3000 ppm	=	3 Kg/m3
4000 ppm	=	4 Kg/m3

Ideal ppm to maintain at all time = 4000ppm

Steamer / Sizing

Power kW	Room Size cbm
3.0	2-3
4.5	3.5-5.5
6.0	5-7
9.0	8-11
12.0	11-14
15.0	13-18
18.0	16-22
22.5	19-26
24.0	22-30

Average Flow Rates

Average Flow Rate Requirements by Various Fixtures	
Shower	4 to 6 GPM
Bathtub	4 to 8 GPM
Toilet	4 to 5 GPM
Lavatory	1 to 3 GPM
Kitchen sink	2 to 3 GPM
½″ hose and nozzle	200 GPH
¾″ hose and nozzle	300 GPH
Lawn sprinkler	120 GPH

Average Amount of Water Required by Various Home and Yard Fixtures	
Drinking fountain, continuously flowing	50 - 100 gal. per day
Each shower bath	60 gal.
To fill bathtub	30 gal.
To flush toilet	6 gal.
To fill lavatory	2 gal.
To sprinkle ¼″ of water on each 1000 sq. feet of lawn	160 gal.
Dishwasher - per load	3 gal.
Automatic washer - per load	50 gal
regeneration of domestic water softener	50-100 gal.

Pipe Friction Loss Charts 1/2” to 1-1/4” I.D.

Loss of Head in Feet due to Friction per 100 Feet of Pipe

	For harsh environments, such as outdoors, only these metals are allowed to be joined together							
	For normal environments such as during storage in warehouses							
	For controlled environments wherein temperature and humidity are managed							
	Never directly join these metals							

A.O. Smith
Innovation has a name.

Water Purifiers | Water Heaters

Baby safe water. On demand.

Presenting the high capacity 100% RO+SCMT water purifier with **7 stage water purification and smart indicators.**

Sorry water purifiers we've raised the bar.

7-stage water purification with RO + SCMT

Pure water storage capacity of 10 liters

Purified hot water

Certified by WQA against NSF/ANSI 58 standards
